

DOĞUKAN CEBECİ

SOFTWARE DEVELOPER

+90 538 623 98 08 | cebecidogukan@gmail.com | Istanbul, Türkiye | Military service: completed
GitHub: github.com/dcebeci | LinkedIn: [linkedin.com/in/dcebeci08](https://www.linkedin.com/in/dcebeci08) | Portfolio: dcebeci.dev

Front-end focused Software Developer with 3 years of professional experience building production web applications with TypeScript, JavaScript and Angular. Experienced in developing scalable and reusable UI architectures, responsive interfaces, RESTful API integrations and maintaining complex legacy codebases. Also experienced with React through full-stack and front-end projects, with a strong focus on component-based architecture and maintainable UI development.

EDUCATION

Bachelor of Science, Computer Engineering, 11/2021

Sivas Cumhuriyet University, Sivas, Türkiye

EXPERIENCE

Frontend Developer | Rapider AI, Remote

December 2022 to August 2025

- Developed core Angular components for a production-ready low-code platform and adapted existing legacy structures to align with new architectural standards.
- Analyzed and refactored legacy codebases across different technologies and application layers; managed TypeScript strict mode migrations and component decomposition processes.
- Designed scalable and reusable layout templates used as platform-wide standards, reducing code duplication and accelerating feature development.
- Integrated complex front-end structures with RESTful APIs while handling error management, loading states and edge cases comprehensively.
- Contributed to establishing shared front-end standards through active participation in code reviews and architectural discussions.
- Coordinated sprint planning and demo processes within an Agile team to support timely and stable project delivery.
- Participated in QA and deployment validation processes to ensure stable production releases.

INTERNSHIPS

C#, ASP.NET Web Development Intern | Leverage Yazılım

August to September 2021 (20 working days)

- Developed web applications using ASP.NET MVC.
- Contributed to the redesign and modernization of the company website.

Python, Django Intern | Kontrolmatik Technologies, IoT Department

September to October 2021 (25 working days)

- Worked on a project delivering sensor data to end users using Python, Django and InfluxDB.

PROJECTS

Full-Stack E-Commerce Application

Angular, Spring Boot, PostgreSQL | Live demo: ecommerce.dcebeci.dev

- Developed a full-stack e-commerce application with JWT-based authentication and role-based authorization (admin/user) using Angular and Spring Boot.
- Built a dynamically manageable homepage where hero sections, navbar content, page titles and featured content are managed through the admin panel.
- Implemented admin panel features for managing products, categories, stock and navigation menus.
- Created a scalable project architecture with a mega menu structure, reusable components and a layered backend design; designed the relational data model in PostgreSQL.

Customer Ledger, Receivables Tracking App

React 19, TypeScript, ASP.NET Core, EF Core, SQL Server | Live demo: customer-ledger.dcebeci.dev

- Built a full-stack customer account ledger for small businesses: work debts, payments (cash, card, transfer), balances, installment plans, due-date tracking, printable statements and Excel export.
- Developed the React and TypeScript front end (React Router, typed API client, JWT session handling) and an ASP.NET Core REST API with EF Core; SQLite in development and SQL Server in production through provider-specific migrations.
- Deployed as a single application on Windows IIS (Plesk), serving the front end from the API; JWT authentication with server-side account validation.

Brew Point, Cafe Management Dashboard

React 19, TypeScript, Vite, Tailwind CSS | GitHub: github.com/dcebeci/brew-point

- Developed a responsive admin dashboard for order, menu and sales analytics management using React and TypeScript.
- Built a reusable component-based UI architecture with React Router, Zustand, TanStack Query, React Hook Form and Zod.
- Implemented dashboard analytics, order management, product CRUD, filtering, pagination, form validation and interactive data visualizations with Recharts.
- Implemented responsive layouts, light/dark theming, TR/EN internationalization, route-based code splitting, loading skeletons and toast notifications.

SKILLS

- **Frontend:** JavaScript, TypeScript, Angular (v12 to v21), RxJS, React, HTML5, CSS3, SCSS, Tailwind CSS
- **Architecture & Integration:** RESTful APIs, Component-Based Development, Reusable UI Architecture, Routing, Reactive Forms, Validation, State Management Concepts, Error Handling, Responsive Design, Legacy Code Refactoring
- **Tools & Methodologies:** Git, Agile/Scrum, Code Review, Deployment Validation, Postman

LANGUAGES

- English: B2
- Turkish: Native

INTERESTS

3D Modeling, Miniature Painting, Drawing, Swimming, Athletics
